Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-8, drawn to combining or distributing information via code word channels using multiple access techniques, classified in class 370, subclass 335.
- II. Claims 9-18, drawn to equalizer tap adjustment, classified in class 375, subclass 232.

The inventions are distinct, each from the other because: Claims 1-8, which form Group I, claim a communication system in which the power level in a first sector is different than that of the second sector during a first time slot as well as a means for determining and distributing the power adjustment. Claims 9-18, which form Group II, claim a mobile unit and equalizer. The equalizer comprised in part by a plurality of taps, each of which is associated with two coefficients, coupled to a summing node.

Because these inventions are distinct for the reasons given above and the search required for claims 1-8 is not required for claims 9-18, restriction for examination purposes as indicated is proper.
